

# Solar Basics: Albedo

## TEST YOUR KNOWLEDGE

1. Touch both the black and the white side of the brick.  
Which side is warmer? Which side is colder?  
Which side of the brick has the highest **Albedo**?
2. Touch both the black cloth and the white cloth.  
Which color is warmer? Which color is colder?  
Which color has the highest **Albedo**?

Press and release trigger to test your guess.

## SOLAR BASIC FACTS

- Dark colored objects absorb sunlight and convert it to heat. They generally have a lower albedo.
- Light colors reflect the sunlight and have a higher albedo.
- Ice and snow reflects; water and dirt absorbs.
